## **DETAIL ACTION**

### ***Notice to Applicant(s)***

1. This application has been examined. Claims 1-6 are pending.
2. The prior art filed on January 21, 2004 has been considered.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. § 102(b) as being anticipated by Yokoyama (6,278,941).
5. As per claim 1, Yokoyama discloses a navigation terminal includes a measurement section for measuring a current position of the vehicle (see figure 1, item 104), a communication section for transmitting information to an information center (see figure 1, item 108), and a destination setting section for setting a destination (see figure 1, items 105 and 106). Yokoyama also discloses that after the communication section establishes a connection line with the information center, the communication section transmits information indicating the measured current position as information for router search (see at least figure 5, steps S10a-S11b).

Art Unit: 3661

6. As per claim 2, Yokoyama further discloses the information for the router search includes information indicating the destination (see at least figure 5, steps S12b and S13b).

7. With respect to claims 3-6, the limitations of these claims have been noted in the rejections above. They are therefore considered rejected as set forth above.

### ***Conclusion***

8. All claims are rejected.

9. The following references are cited as being of general interest: Kondou et al. (6,073,075), Yokoyama et al. (6,202,024), Machii et al. (6,324,467), and Ratert et al. (6,505,117).
